NO SCHOOL
- 2/23 Progress Reports Mailed
- 3/5 NO SCHOOL
INSERVICE

Cold Weather

Please be sure your child has appropriate winter weather clothing to be outdoors at recess. Winter jacket, hat, gloves, boots and snow pants will protect your child from the cold before and after school, as well as at recesses. Please label these items with your child's name and check the Lost and Found frequently. Thank you!

The School Store is up and running every 'B' day during lunch recess, with new inventory arriving weekly. Please remind your student that their school store money is for them to spend, not for them to purchase items for their friends. School Store items range in price from \$.10 to \$1.50.

The Science Fair is currently scheduled for February 15th. Please keep an eye out for information. All information will be posted in our weekly newsletter as soon as it becomes available.

The number of flu cases in WFSD have been minimal so far. We have had a mild gastrointestinal bug but nothing more than what we normally have.

The flu (respiratory illness) is widespread in the entire US but Wisconsin is considered moderate in the number of cases. Most of the country is high so we have avoided that so far.

The H3N2 is the predominant strain causing illness (78% of cases). This virus was in the flu vaccine this year but there are several hundred genetic groups of the H3N2 causing illnesses. The CDC is also finding that this particular virus changes rapidly to adapt to selective pressures.

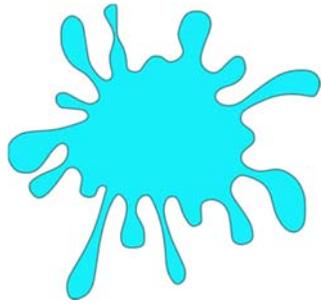

The flu season began early this year which is why it may seem to be a severe flu season but compared to other years it is a typical year so far.

Be sure to wash your hands often, keep your hands off your face, cover open wounds, remind others to cough/sneeze into their sleeve, have Kleenex and hand sanitizer ready to use.

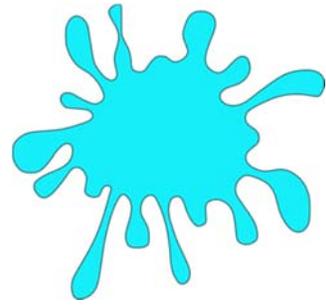

I have listed below the symptoms of a cold versus the symptoms of flu. And remember, a gastrointestinal bug is not the flu - it is a gastrointestinal bug.

FLU	SYMPTOMS	COLD
High	Fever (above 100)	Rare
Prominent	Headache	Rare
Usual, can be severe	General aches/pains	Slight
Can last 2-3 weeks	Fatigue/Weakness	Mild
Early and prominent	Extreme Exhaustion	Never
Sometimes	Stuffy nose	Common
Sometimes	Sneezing	Usual
